

California “Renewable Roadway”: E85 Refueling Network Project DOE Funding Update – February 2010

This project provided funds to install 14 stations throughout California with three main partners. All 14 stations are open and dispensing E85 as of October 2009. A “caravan-like” press event was held to celebrate the opening of the Pomona and Perris stations on December 16, 2009. A separate press event was held February 24, 2010 in the Sacramento area.
